NOT AN ABNORMAL GROWTH

Custom House Loaded With Goods From This Country.

Needs for a Bank Representing This Continent in the Orient.

nteresting shape in the annual report of United States Consul Fowler, at Chefoo, which was given out yesterday at the State Department, He says there has been a marked increase in imports of all American goods into China and that the gain is not an abnormal one. He adds:

Figures at hand not only prove that nports of American merchandise are inreasing on a sound basis, but that the year 1897 shows phenomenal strides. The etatletics for the first six months of this year were especially obtained from the custom house, and covering as they do the months of January, February and March, when traffic was at its lowest-owing to difficulties on Inland transportation, the closing of the ports north of here by ce and the time when the political situa lon was very tense-they seem to show that when the books for the year 1898 ire balanced, the value of American merhandise imported here will lead all others. It will possibly equal, if not exceed the values for all Europe.

"The value of American flour imported furing this period was greater than for the combined years of 1894, 1895, 1896 and 1897, if we take the only fair standardthe customs tact. The gold value for the four years (averaging the halkwan tae for that period at 79.3 cents) was \$43,450.67 egaliest BL383.87 (at 68.5 cents) for the ullest six months of the year 1898. This s truly a wonderful increase. No doub the presence of the great military camps Russia, Great Britain, and Germany n this vicinity have had considerable to do with this increase. Further, this is the first year that the customs reports for Chefoo make mention of American flour American ginseng also makes its first ap-pearance this year. This is all the more remarkable, because hitherto Chefoo has always been the entrepot for Korean gir

eng entering China.
"It is also shown that in 1997 the im-ports of all our goods were four times as atice as those for 1883 (excepting oil, which was a little more than doubled), that the imports for the first six months of this year exceeded those for the entireyears of 1893 and 1894 in the case of drills and in the case of jeans and sheeting ev-ery year excepting 1897.

Of the seventy-six classes of imports numerated in the table of imports for 987, forty-six show a gain over 1893-wenty-five from gold standard countries, which three are from Japan, four from the United States, while the only gain from England is cotton yarn. Of the thirretwo decreases, eight are from silver standard countries and twenty-four from gold standard countries, of which Great Britain (England and India) suffered losses in seven classes; Russia, one; Japan

The value of the foreign imports into Chefoo in 187 was 11 22.0 4 halkwan tuels (R. 602.34 gold), while the value of the segment of the goods specifically classed as American Education of the control of the control of the control of the control of the supposed that it represents all our trades for, as repeatedly stated in previous reports, the data for all the other unenumerated American imports are not obtainable in the customs classification of foreign imports, the great majority comes from Hongkong, Japan, and other Asiatic countries, and there are many classes of produce—optum, seawed, etc. on.

(The value of the foreign imports into Chefoo in 1837 was 11,225.0.4 halkwan tuels (\$5,602.347 gold), while the value of these goods specifically classed as Annelcan was 2,812,081 halkwan tuels, or \$2,01,681.) "While this is almost one-fourth of the entire value of foreign imports, it is not to be supposed that it represents all our trade, for an energated value in tralasses of produce-opium, seawe d. etc. which we do not compete. The valu Asiatic goods imported was 2.157.111 baikwan taels."

specified as American was almost ten times greater than those specified as

from Great Britain.)
"The custom house jetty at Chefoo is always crowded and piled high with American merchandise," said the consui. 'One of the greatest needs of the American merchant is an American bank in China. There is a large field for it, and I feel confident that if one of our New York banking houses established a branch in Shanghai, they would reap a handsome reward. There are, in China, French, Russian, German and several English banks; and it is through thes that all United States trade is conducted. avolving a great loss to our commerce, have hopes that ere long some one will rove enterprising enough to enter this field. There is none more produable in the world. The Hongkong and Shanghai bank's shares sell at 215 per cent promising opening for fire insurance companies.

"It may be of interest to know that the otal shipments to the Philippines from Shanghat in 1897 amounted to 12,892 haiksnangam in 188, amounted to 12,982 hatk-wan taels (\$9,614), of which all but 2,301 halkwan taels (\$1,703) were from other ports; while within twenty-four hours of the receipt of orders to legalize invoices for Manila, I certified invoices covering straw braid for that city to the value 5,257.51 Chefoo taels (\$2,653)."

more can any womanianly woman ask? It is a boon that Heaven intended should be granted to every woman. Thousands fail of this because they have neglected to look after their health in a womanly way. The health of a woman's babies is dependent upon her own health during the period of prospective maternity. The prospective mother cannot be too particular about her physical condition. If she suffers from local weakness, nervousness or loss of vigor and virility, her children will be weak, puny and sickly. Dr. Pierce's Favorite Prescription is the only unfailing cure for all weakness and disease Pierce's Favorite Prescription is the only unfailing cure for all weakness and disease of the delicate and important organs that bear the brunt of maternity. It makes these organs strong, healthy, vigorous, virile and elastic. It makes the prospective mother strong and cheerful. It robs maternity of its perils. It insures a baby constitution ally strong. It is the invention of an eminent and skillful specialist, who has had thirty years' training in this particular branch, during which time he and his staff of physicians have prescribed for many thousands of women. Medicines dealers sell it and an homest dealer will not urgupon you an inferior substitute merely for upon you an inferior substitute merely for the little added profit he may make thereon "I am the mother of a nice baby four and a half mouths old," writes Mrs. J. Their Volunteer Brothers. An interesting meeting was held last vening at the rooms of Company A. Sixth Battalion, National Guard Armory. The features of the occasion were the presentation by the members of the organization of suitable medals to those of the ompany who enlisted in the First District Regiment, and the reading of the cores of the qualified sharpshooters.

Company A is the only military organization in the country requiring its members to qualify annually in the gallery and n the range as sharpshooters, and this year's work is better than ever. More than fifty members were entitled to the cross presented by the Government.

This excellent work has been brought about through the energy of Capitaln J. S. Tomilinson, who can legitimately claim he champion company of crack shots in the Champion company of crack shots in the United States. the United States.

WEEK. More Convincing Proof of Doctor Cowden's Conscientious Endeavor to Serve the

Whole Public and Not the Favored Few-Continued Hard Times and Acute Diseases the Motive of this Offer-The Opportunity is Limited, but the Treatment Will Be Fully Up to the Office Standard -No Lack of Attention or Care Will Be Tolerated - You Will in All Cases Receive the Trantment That Cures.

THE REASON.

It is generally understood, as was intended, that it is impossible for the physicians of those offices to visit patients at their homes; also that such acute diseases as Typhoid, Scarlet and Mal-arial Fevers, as well as Diphtheria, Measles, &c., did not come within the province of their work. But it was not intended to be understood that they did not treat such ailments as acute Colds, Sore Throats, Coughs, Neuralgias, Headaches, Rheumatism, acute Indigestions, &c. On the contrary, Dr. Cowden takes this opportunity to state that patients suffering from these maladies can be just as successfully treated as those having chronic troubles. It is to meet this condition of affairs and obviate this misunderstanding that this offer is made. There are scores of people n this city, who from time to time, as they catch cold, have attacks of indigestion ralgia, headache, rheumatism, &c., would gizelly avail themselves of Dr. Cowden's treatment if they knew he would accept their cases for the

few days they would need medication.

This offer will also meet with the approval of undreds of former patients, who have been cured of deafness, asthma, bronchitis, &c. Hav-ing already satisfactorily tested the methods sed, they can gladly apply for relief for any other minor ailments that may arise. Again there are many who can arrange to pay one dollar a week, but who would find it a burden to pay a proportionately large fee by the Then there are many persons who may be doubtful as to the effect of this treatment in their own cases. This offer will give them a few days' or weeks' trial at a trivial cost. Other reasons might be assigned, but these are sufficient to in duce Dr. Cowden to make the following offer

for a limited time. THE OFFER.

All persons who apply at the Cowden office for treatment during the remaining days of Defor treatment during the remaining days of the comber will receive proper professional attention, together with necessary medicines, at the rate of \$1 a week until cuted.
